

# EGG INDUSTRY PROGRAM

**IMPROVE QUALITY, CONTROL PROCESS PARAMETERS, REDUCE CLEANING COST WITH NEW CLEANING TECHNOLOGY UTILIZING OUR SIMPLISTIC EQUIPMENT DESIGN.**

- Provides complete in-process control of incoming parameters as environmental or product conditions may change.
- New cleaning technology allows our products to control individual parameters which lowers your cost per dozen.
- Equipment design provides consistent, controlled and precise egg wash solution throughout the day.
- Initial charge button and process control boost allow for proper dosing rates.
- Plug-in components provide simple maintenance.
- Our egg cleaning system allows the process to be controlled, thus producing a standard, consistent product.

## WASHING PRODUCTS

### EGG BRITE L-350

A liquid concentrate specifically designed for the egg washing industry. It offers a unique combination of alkaline builders and wetting agents in one package.

### PREMIUM EGG CLEANER

A powder cleaner specifically designed for the egg washing industry. It combines alkaline builders, buffers and wetting agents in one package.

### ANTIFOAM 772

A liquid concentrated surfactant blend that provides superior process control for foam suppression and surface water removal.

## ACID PRODUCTS

### ACID CLEANER TC

A liquid acid cleaner containing phosphoric and glycolic acids.

### ACID No. 3+

A liquid acid cleaner containing phosphoric acid.

### SOAR

A liquid cleaner without the disadvantages of harsh acids.

# EGG INDUSTRY PROGRAM

## SERVICE

Each technical sales representative develops a program of service that meets your expectations and requirements. Our representatives inspect and audit the operational processes as well as provide technical service reports. We consult with management to maintain important communication links which may address issues concerning the chemical or operational process. We provide assistance with your sanitation operational procedures to ensure program consistency and compliance. We make certain all safety information is present at your facility, including Material Safety Data Sheets, labels and placards. Employees are trained on chemical safety programs. Our Material Safety Data Sheets and secondary container labels are formatted in both English and Spanish.

## LABORATORY

Our staff is complemented with state-of-the-art equipment which provides the technical support to resolve special cleaning needs, shelf life concerns or new process applications. Our equipment and staff can simulate production processes. On-site microbiological testing is available as a third party auditing service.

## FOOD SAFETY AND BIO-SECURITY

We understand food safety and bio-security are important issues to our customers. We inspect shipments and offer "tamper-proof" safety packaging. We are available to assist with your HACCP and food security programs.

## TECHNICAL SALES AND CORPORATE SUPPORT

Our Corporate staff of application and design engineers, chemists, biologists, food plant sanitation specialists and environmental and safety consultants provide a network of expertise to assist your company. Our customers have direct access to the Product Support and Engineering teams which facilitates prompt response to all inquiries. Our Technical Sales Representatives have many years of food plant experience, specializing in regulatory compliance, process system controls, specialty chemical management and program development.
